New CO-OP program in International Development and Globalization

The Faculty of Social Sciences is pleased to offer a co-operative education option in the International Development and Globalization program.

Students choosing the International Development and Globalization program, with a co-op option, have an edge over their peers due to the University's proximity to organizations such as the Canadian Development Agency, the Department of Foreign Affairs and International Trade, and many non-governmental agencies operating in the area of international development.

CO-OPERATIVE EDUCATION PROGRAM

Co-operative education seeks to relate classroom learning to its practical application in the workplace. Co-op students alternate study terms on campus with four-month paid work terms. During the work terms, students are placed in jobs which should progressively involve more responsibilities and require more skills.

1. Schedule of work and study terms

	Summer	Fall	Winter
Option 1			
First year		study	study
Second year		study	study
Third year	work term	study	work term
Fourth year	study	work term	study
Fifth year	work term	study	
Option 2			
First year		study	study
Second year		study	study
Third year	work term	study	work term
Fourth year	work term	work term	study
Fifth year	study	study	

2. Admission into the Co-operative Education Program

To be admissible, students must meet the following conditions:

- Canadian citizenship or permanent residency status;
- registration in the honours program;
- completion of all first-year courses and normal course requirements for the fall session of the second year or the equivalent;
- cumulative grade point average (CGPA) of 6.0 or more;
- submission of their application for admission to the central co-ordinating office before September 30 (see 5 below).

3. Requirements

Students in the co-operative education option must maintain a CGPA of 6.0 or more throughout the program. During each work term they must register in the Co-op Work Term Report course and submit a work term report at the end of the term. The course requirements for the co-op degree are those of the regular program plus the Co-op Work Term Report courses. The regulations governing the co-operative education programs are given in the Co-op Students Handbook and in the document entitled Regulations and Procedures Governing Co-operative Education Programs.

4. Advantages of co-operative education

The combination of work and study helps students both in their choice of courses and in their choice of career. Compared to other graduates, co-op graduates are often offered permanent positions involving more responsibilities and offering higher salaries. The salary earned during work terms helps to finance the student's education.

5. Central Co-ordinating Office

The University of Ottawa has set up a central co-ordinating office to administer the work term component of all its co-operative education programs. The Office provides the necessary services to all participants in a co-operative education program, manages the placement process (secures employer participation, arranges interviews, places students, and other processes) and participates in monitoring work terms. A faculty member from each discipline is also involved in co-ordinating the co-operative education programs. For all questions concerning the program, please contact the office or the department co-ordinator.

New CO-OP program in Public Administration

The Faculty of Social Sciences is pleased to offer a co-operative education option in the Public Administration program.

Because we are situated in the nation's capital, students in our Public Administration program with co-op option, benefit from privileged access and exciting placement opportunities at all levels of government: federal, provincial and municipal.

CO-OPERATIVE EDUCATION PROGRAM

Co-operative education seeks to relate classroom learning to its practical application in the workplace. Co-op students alternate study terms on campus with four-month paid work terms.
