Liste des documents / List of records	62

NOTE AUX CHERCHEURS

Note sur le classement et la description: Ce fonds d'archives n'est pas classé. L'inventaire préliminaire qui suit contient la liste des titres des dossiers tels que reçus de l'unité administrative ou scolaire ainsi que les individus qui les ont créés.

Note sur la langue des documents : Les titres des dossiers sont dans la langue choisie par l'unité ou l'individu pour nommer les dossiers. Cependant, on retrouve vraisemblablement dans ce fonds des documents dans les deux langues officielles de l'Université, soit le français et l'anglais.

Note sur les restrictions à la consultation : La consultation de ce fonds d'archives est régie par divers règlements, procédures et lois, notamment la *Loi sur l'accès à l'information et la protection de la vie privée*, les règlements 11 – *Accès aux Archives de l'Université d'Ottawa* et 90 – *La consultation d'archives*. Les dossiers doivent obligatoirement être vérifiés par le personnel avant d'être consultés. Il est donc recommandé de fournir votre liste avant de vous présenter aux archives et de prévoir un temps d'attente pouvant varier selon les disponibilités du personnel.

Note sur les restrictions à la reproduction des documents : La reproduction des documents de ce fonds d'archives est régie par la *Loi sur le droit d'auteur* et la procédure numéro 16 – *Reproduction de documents*.

Note sur les instruments de recherche : Il existe potentiellement d'autres instruments de recherche pour ce fonds, préparés en fonction du support des documents (ex. iconographique, sonores, objets, etc.). D'autres instruments de recherche peuvent aussi compléter l'information.

NOTE TO RESEARCHERS

Note on arrangement and description: The arrangement of this fonds has not yet been completed. This preliminary inventory compiles titles of files as received by the administrative or academic unit or persons that produced them.

Note on language: The file titles are written in the language preferred by the administrative or academic unit or person that produced them. However, you can expect to find documents in both of the University's official languages: English and French.

Note on restrictions on access: Access to documents is governed by various laws, policies and procedures, namely the *Freedom of Information and Protection of Privacy Act*, Policy 11 – *Access to the University of Ottawa Archives*, Policy 90 – *Access to Information and Protection of Privacy* and Procedure 4 – *La consultation d'archives*. All files will be checked by AUO staff prior to their consultation and in accordance with staff availability. Therefore, researchers are encouraged to submit their consultation list before their visit to avoid unnecessary waiting periods.

Note on the terms governing reproduction: All reproductions are governed by the *Canadian Copyright Act* and Procedure 16 – *Reproduction de documents*.

Note on finding aids: There are probably other finding aids relating to this fonds, according to their material type (ex. Graphic materials, sound recordings, objects, etc.). Other finding aids can also be used to complete the information.

NOTE GÉNÉRALE

Voir aussi le fonds 5 pour un dossier historique à la cote X20-32-10.

Pour les procès-verbaux du Conseil de la faculté et du comité exécutif voir aussi Département de biologie (Fonds 179).

Lors d'une recherche pour des syllabus, ne pas oublier de chercher dans les documents de charge d'enseignement et les plans de cours.

GENERAL NOTE

Also see fonds 5 for historical documentation in the file X20-32-10.

For the minutes of the Faculty Council and Executive Committee also see the Biology Department (Fonds 179).

When doing a research for course outlines, remember to look up the teaching work load files.

I - INTRODUCTION

L'enseignement des sciences a toujours constitué un objectif important à l'Université d'Ottawa. Dès 1874, le Recteur Joseph-Henri Tabaret introduisait à la Faculté des arts un programme menant au certificat en génie civil. Malheureusement, on devait suspendre le programme en 1880, faute d'inscriptions. En revanche, le baccalauréat ès sciences figurait à l'annuaire cette même année.

En 1885, plusieurs programmes étaient annoncés : le certificat en arpentage, les baccalauréats en génie civil, en génie mécanique et en génie minier, ainsi qu'une maîtrise en science et génie. Malgré cette expansion remarquable, très peu d'étudiants profitèrent des cours, de sorte que le premier baccalauréat ès sciences ne fut remis qu'en 1897, soit dix-sept ans après l'inauguration du programme.

En 1901, un pavillon réservé à l'enseignement des sciences à l'Université d'Ottawa ouvrait ses portes. Parfaitement adapté aux besoins de l'époque, cet édifice situé à l'intersection des rues Wilbrod et Waller renfermait un musée d'histoire naturelle, un amphithéâtre, des salles de cours et les laboratoires de chimie, de physique et de minéralogie.

En 1903, l'édifice principal fut rasé par un incendie, et l'expansion de l'Université s'en est vu tout d'un coup freiné. Dès l'année suivante toutefois, on entreprit la construction d'un nouvel édifice central qu'on appelle depuis 1971 le pavillon Tabaret.

En 1905, l'Université annonçait son intention de créer un département de sciences appliquées pour relancer les programmes en génie civil, en génie minier et en génie électrique. Cependant, divers problèmes, dont des querelles linguistiques, firent que l'enseignement des sciences resta dans un état stationnaire jusqu'en 1946.

Après la seconde guerre mondiale, le secteur des sciences évolua au même rythme que l'ensemble de l'Université d'Ottawa. En 1945, on fondait l'École de médecine et en juin 1946, ayant considéré la proposition des professeurs de sciences (recrutés en majorité par le R.P. Lavigne à l'Université Laval), le Sénat universitaire votait à l'unanimité d'établir l'École des sciences appliquées. Sous l'égide de la Faculté des arts, l'École offrait un programme menant après quatre années d'études au B.A. ès sciences et un cours en génie civil que les étudiants pouvaient poursuivre aux universités McGill, Queen's et Laval. De 1946 à 1948, l'École des sciences appliquées se trouvait au pavillon des sciences (133 Wilbrod), et de 1948 à 1953, à l'ancienne école Normale (125 Wilbrod).

En juillet 1953, l'École accédait au rang de faculté et offrait des programmes d'études supérieures et de recherches en sciences et génie. Logée au 125 Wilbrod, la Faculté des sciences pures et appliquées déménageait en 1954 dans d'anciennes casernes militaires que l'on avait rénovées. Ces baraques, cédées par l'École de médecine lorsqu'elle emménagea la dernière n'étant démolie qu'au début des années 70. Comme le secteur des sciences à l'Université d'Ottawa prenait beaucoup d'ampleur, les casernes furent successivement démolies pour faire place à des pavillons modernes et spacieux qui serviraient plus efficacement à l'enseignement des sciences. Depuis 1970, la Faculté des sciences et génie occupe cinq pavillons au sud du campus, à l'endroit où se trouvait jadis l'Ovale collégial :

Pavillon Marion (chimie) - Inauguré en 1958

Pavillon Vachon (biochimie) - Inauguré en 1958

Pavillon Gendron (biologie) - Inauguré en 1960

Pavillon MacDonald (physique et mathématiques) - Inauguré en 1966

Pavillon Colonel By (géologie et génie) - Inauguré en 1970

À la fin des années 50, la Faculté se composait de huit départements dont deux de génie. Elle compte en 1982 sept départements de science, dont celui de biochimie qui est dirigé conjointement avec l'École de médecine, et quatre départements de génie :

Biochimie	-	Fondé en 1946
Mathématique	-	Fondé en 1953
Biologie	-	Fondé en 1954
Chimie	-	Fondé en 1954
Physique	-	Fondé en 1955
Géologie	-	Fondé en 1958
Informatique	-	Fondé en 1970
Génie chimique	-	Fondé en 1955
Génie électrique	-	Fondé en 1956
Génie civil	-	Fondé en 1964
Génie mécanique	-	Fondé en 1967

Depuis les débuts de la Faculté jusqu'en 1977, quatre doyens seulement se sont succédé, ce qui démontre clairement la stabilité de sa croissance :

Pierre R. Gendron, 1953-1962
Louis-Paul Dugal, 1962-1965
Léo Marion, 1965-1969
Antoine d'Iorio, 1969-1977

En 1955, les inscriptions à la Faculté se chiffraient à 213. En 1962, 349 étudiants étaient inscrits en science et 220 en génie. En 1978, les inscriptions s'élevaient à 1327 en sciences et 921 en génie. En seize ans (1962-1978), le nombre d'étudiants à la Faculté des sciences et génie a donc quadruplé, passant de 569 à 2248.

Depuis la fondation de l'École des sciences appliquées en 1946, l'enseignement des sciences à l'Université d'Ottawa, après quelques années d'hésitation, s'est développé avec une étonnante rapidité. Grâce au dynamisme et à la clairvoyance de nombreuses personnes à la Faculté des sciences, personnes qui ont su trouver les sources de financement indispensables, l'Université d'Ottawa peut se féliciter d'être à la fine pointe en enseignement des sciences.

Le fonds d'archives de la Faculté des sciences et de génie se compose surtout de documents administratifs et est classé de manière à répondre aux exigences de l'administration. Complémentaires aux manuscrits, les imprimés, les photographies et les plans renseignent davantage sur l'histoire de la Faculté.

I - INTRODUCTION

The University of Ottawa has always considered the teaching of science as an important objective. As early as 1874, Rector Joseph-Henri Tabaret set up a certificate program in civil engineering at the Faculty of Arts. Unfortunately, the program was suspended in 1880 for lack of registrations. However, the bachelor of science degree was offered that same year in the University calendar.

In 1885, several programs were announced, namely a certificate in surveying, bachelor degrees in civil engineering, mechanical engineering and mines engineering, as well as a masters in science and engineering. Despite this considerable expansion, few students saw fit to enroll, and this resulted in the first sciences baccalaureate not being awarded until 1897, seventeen years after the program's inauguration.

In 1901, the University opened a building exclusively for the science sector. Perfectly adapted to the requirements of the time, this structure at the corner of Waller and Wilbrod Streets housed a museum of natural history, an auditorium. Classrooms, as well as the chemistry, physics and mineralogy labs.

The University's rapid growth came to an abrupt halt when the main campus building burned down in 1903. The following year, construction began on a new central building, called Tabaret Hall since 1971.

In 1905, the University announced its intention to create a department of applied sciences in an effort to reinstate the civil engineering, mines engineering and mechanical engineering programs. However, because of various problems, for example, linguistic disputes, instruction in the sciences remained static until 1946.

After the Second World War, growth in the science sector matched that of the University on the whole. En 1945, the School of Medecine was founded and in June of 1946, the University Senate, on considering a proposal from the science professors (recruited for the most part by R. F. Lavigne at Laval University), voted unanimously to open a School of Applied Sciences. Under the direction of the Faculty of Arts, the School offered a four-year B. A. science degree and a course in civil engineering that students could pursue at McGill, Queen's and Laval. From 1946 to 1948, the School of Applied Sciences had its quarters in the science building (133 Wilbrod), and from 1948 to 1953 in the old teachers' college (125 Wilbrod).

In July of 1953, the School of Applied Sciences attained faculty status and offered graduate and research programs in science and engineering. In 1954, the Faculty of

Pure and Applied Sciences left its quarters at 125 Wilbrod and moved into renovated military barracks which had been left vacant by the School of Medicine's move to its own building in 1953. The barracks served for quite some time, the last being torn down only in 1970. As the University went through vigorous expansion, the barracks were demolished successively to make room for modern and spacious buildings that would serve the teaching of science more efficiently.

Since 1970, the Faculty of Science and Engineering occupies five buildings located in the south part of the campus, where the college Oval used to be:

Marion Hall (Chemistry) Inaugurated in 1958
Vachon Hall (biochemistry) inaugurated in 1958
Gendron Hall (Biology) Inaugurated in 1960
MacDonald Hall (Physics and Math) Inaugurated in 1966
Colonel By Hall (Geology and Engineering) Inaugurated in 1970

By the end of the 1950's, the Faculty was made of up two engineering and six science departments; in 1982, it boasted four engineering and seven science units, including the Department of Biochemistry, which it directs jointly with the School of Medicine.

Chemical engineering Founded in 1955
Electrical engineering Founded in 1956
Civil engineering Founded in 1964
Mechanical engineering Founded in 1967
Biochemistry Founded in 1946
Mathematics Founded in 1953
Biology Founded in 1954
Chemistry Founded in 1954
Physics Founded in 1955
Geology Founded in 1958
Computer Science Founded in 1970

From its very beginnings up until 1977, the Faculty had but four deans, a clear indication of its stable growth over the years:

Pierre R. Gendron 1953-1962
Louis-Paul Dugal 1962-1965
Léo Marion 1965-1969
Antoine D'lorio 1969-1977

As of 1955, registrations at the Faculty came to 213. In 1962, 349 students in science and 220 in engineering. In 1978, registrations climbed to 1327 in science and 921 in engineering. Thus, over a sixteen-year period (1962-1978), the number of students at the Faculty of Science and Engineering increased fourfold, from 569 to 2248.

Despite a few years of uncertainty, instruction in the sciences at the University underwent stunningly rapid growth after the foundation of the Faculty of Applied Sciences in 1946. Thanks to the vigour and foresight of the many Science Faculty members who came to grips with the expanding role of their area in post World War Two society and who managed to round up vital financial resources, the University can now take pride in the efficiency and distinction of its science sector.

The records of the Faculty of Science and Engineering are made up mostly of administrative documents and are filed so as to meet administrative requirements. Additional information can be drawn from printed texts, photos and plans, which complement the manuscript documents on hand.

II - SOURCES COMPLÉMENTAIRES

Le chercheur devra consulter les annuaires de l'Université d'Ottawa et le fonds ES 1001-5000 aux Archives de l'Université Saint-Paul. De plus, deux écrits sont d'un intérêt certain : Au cœur de la nature, par Gaston Carrière, dans la Revue de l'Université d'Ottawa, vol. 26 (no.4), pp. 498-510 et Histoire documentaire de la Congrégation des Missionnaires Oblats de Marie-Immaculée dans l'Est du Canada, par Gaston Carrière, Ottawa, Éditions de l'Université d'Ottawa. 1967, tome 6, pp. 283-291.

II - COMPLEMENTARY SOURCES

Researchers should consult the University of Ottawa calendars and the Record Group ES 1001-5000 at Saint-Paul's University Archives. Moreover, two publications are of interest: Au coeur de la nature, by Gaston Carrière, in Revue de l'Université d'Ottawa, vol. 26 (no.4), pp. 498-510 and Histoire documentaire de la Congrégation des Missionnaires Oblats de Marie-Immaculée dans l'Est du Canada, by Gaston Carrière, Ottawa, University of Ottawa Press, 1967, volume 6, pp. 283-291.

5.0 TEACHING / ENSEIGNEMENT

The examination questionnaires of the Faculty of Science and Engineering retained by the Archives of the University of Ottawa constitute a reasonable representative sample: a complete year at four year intervals.

Les questionnaires d'examen de la Faculté des sciences et génie conservés aux Archives de l'Université d'Ottawa constituent un échantillonnage raisonné aussi significatif que possible. Ces documents ont été conservés selon le système suivant : une année complète toutes les quatre années pour lesquelles des questionnaires ont été versés.

ELG 2110. - Measurements: Final Exam = Examen final / Professor A. Guibord. - April 24, 1979

ELG 2110. - Measurements: Supplemental Examination = Examen supplémentaire / Professor A. Guibord. - July 16, 1979

ELG 2130. - Introduction to Digital Computer Electronics: Final Examination / Professor S. F. Gourley. - December 21, 1978

ELG 2130. - Introduction to Digital Computer Electronics: Supplemental Exam / Professor S. F. Gourley. - February 12, 1979

ELG 2180. - Introduction to Computer Methods in the E. E.: Final Exam / Professor C. V. W. Armstrong. - December 11, 1978

ELG 2180. - Introduction to Computer Methods in the E. E.: Supplemental Exam / Professor C. V. W. Armstrong. - [1978-1979]

ELG 2220. - Basic Circuits Theory : examen de Noël = Christmas Examination / Professor N. U. Ahmed. - December 19, 1978

ELG 2220. - Circuit Theory: Supplemental Examination = Examen de reprise / Professor N. U. Ahmed. - [1978-1979]

ELG 2220. - Circuit Theory: Final Examination = Examen final / Professor N. U. Ahmed. - April 18, 1979

ELG 2510. - Mesures électriques : examen final / Professeur C. Lemyre. - 17 avril 1979

ELG 2510. - Mesures électriques : examen de reprise / Professeur C. Lemyre. - Juillet 1979

ELG 2620. - Théorie des circuits : examen final / Professeur N. D. Georganas. - 18 avril 1979

ELG 2620. - Théorie des circuits : examen de reprise / Professeur Dr. N. D. Georganas. - Juillet 1979

ELG 3170. - Fundamentals of Communication Systems: Final Examination = Examen final / Professor K. Feher. - April 9, 1979

ELG 3170. - Fundamentals of Communication Systems: Supplemental Exam = Examen de reprise / Professor K. Feher. - July 1979

ELG 3200. - Electromagnetic Engineering: Final Examination = Examen final / Professor P. Bhartia. - April 23, 1979

ELG 3200. - Electromagnetic Engineering: Supplemental Examination / Professor P. Bhartia. - July 18, 1979

ELG 3220. - Networks and Signals : examen de Noël = Christmas Examination / Professor M. Golberg. - December 20, 1978

ELG 3220. - Networks and Signals : examen de reprise = Supplemental Examination / Professor M. Golberg. - [1978-1979]

ELG 3220. - Networks and Signals : examen final = Final Examination / Professor M. Golberg. - April 19, 1979

ELG 3230. - Electronics I & II : examen de reprise = Supplemental Exam / Professor Dr. C. Lemyre. - July 1979

ELG 3230-3231. - Electronics I & II : examen de Noël et examen final = Christmas Examination and Final Examination / Professor Dr. Clément Lemyre. - December 13, 1978

ELG 3230-3132. - Electronics I & II : examen final = Final Examination / Professor Dr. C. Lemyre. - April 17, 1979 = 17 avril 17, 1979

ELG 3240. - Electromechanical Energy Conversion : examen de Noël = Christmas Examination / Professor J. V. Marsh. - December 12, 1978

ELG 3240. - Electromechanical Energy Conversion : examen final = Final Examination / Professor J. V. Marsh. - April 18, 1979 = 18 avril 1979

ELG 3240. - Electromechanical Energy Conversion : examen de reprise = Supplemental Examination / Professor J. V. Marsh. - July 1979

ELG 3250. - Principles of Electrical Engineering / Professor L. -A. Beauchesne. - December 15, 1978

ELG 3250. - Examen Final = Final Examination / Professor L. -A. Beauchesne. - April 12, 1979 = 12 avril 1979

ELG 3250. - Principles of Electrical Engineering: Supplemental Exam / Professor L. A. Beauchesne. - July 19, 1979

ELG 3600. - Champs et Matériaux : examen de Noël / Professeur L. -A. Beauchesne. - 18 décembre 1978

ELG 3600. - Électromagnétisme : examen final / Professeur L. -A. Beauchesne. - 23 avril 1979

ELG 3600. - Électromagnétisme : examen de reprise / Professeur L. -A. Beauchesne. - 18 juillet 1979

ELG 4130. - Linear Electronics : examen de Noël = Christmas Examination / Professor Dr. Kamilo Feher. - December 13, 1978

ELG 4132. - Digital electronics : examen final = Final Examination / Professor C. V. W. Armstrong. - April 10, 1979

ELG 4141. - Power System Analysis II: Final Examination = Examen final / Professor N. Rau. - April 23, 1979

ELG 4141. - Power System Analysis II: Supplemental Examination / Professor N. Rau. - July 20, 1979

ELG 4142. - Engineering Application of Solar Energy: Final Examination = Examen final / Professor D. Lahey. - April 20, 1979

ELG 4142. - Engineering Application of Solar Energy: Supplemental Examination = Examen de reprise / Professor D. Lahey. - July 16, 1979

ELG 4181-CSI 3101. - Logic Circuits I : examen final-2 partie = Final Examination-Part 2 / Professor M. Krieger. - December 20, 1978

ELG 4181-CSI 3101. - Logic Circuits I : examen de reprise = Supplemental Examination / Professor Dr. M. Krieger. - February 1979

BOÎTE NB-7492 [RESTRICTIONS]

Chemise 2. - Questionnaires d'examens = Exams. - ELG. - 1978-1979

ELG 4182-CSI 3102. - Logic Circuits II: Supplemental Examination / Professor M. Krieger. - July 1979

ELG 4183-CSI 3110. - Design of Digital Computer Logic: Final Examination = Examen final / Professor M. Krieger. - April 1979 = Avril 1979

ELG 4183-CSI 3110. - Design of Digital Computer Logic: Supplemental Examination / Professor M. Krieger. - July 1979

ELG 4210. - Systems Engineering : examen final = Final Examination / Professor N. D. Georganas. - April 18, 1979

ELG 4240. - Power Conversion : examen de Noël = Christmas Examination / Professor J. V. Marsh. - December 11, 1978

ELG 4240. - Power Conversion : examen final = Final Examination / Professor J. V. Marsh. - April 26, 1979

ELG 4241. - Transmission and Distribution: Christmas Examination. - December 16, 1978

ELG 4241. - Transmission & Distribution: Final Examination = Examen final / Professor R. J. Densley. - April 9, 1979

ELG 4250. - Control Engineering: Christmas Examination / Dr. A. K. Sen. - December 14, 1978

ELG 4250. - Control Engineering: Final Examination / Dr. A. K. Sen. - April 11, 1979

ELG 4270. - Communications Engineering : examen de Noël = Christmas Exam / Professor Dr. W. Steenaart. - December 11, 1978

ELG 4270. - Communications Engineering : examen final = Final Examination / Professor W. Steenaart. - April 9, 1979

BOÎTE NB-7492 [RESTRICTIONS]

Chemise 3. - Questionnaires d'examens = Exams. - GEO; GES; GNG. - 1978-1979

GEO 1111. - Final Exam / Dr. B. R. Rust. - December 1978

GEO 1111. - Principles of Geology: Supplemental Exam / B. R. Rust. - February 1979

GEO 1112 - Final Exam / Dr. B. R. Rust. - April 19, 1979

GEO 1112. - Supplemental Exam / Dr. B. R. Rust. - July 1979

GEO 1511. - Examen final = Final Exam / Dr. Calvin Pride. - Décembre 1978 =
December 1978

GEO 1511. - Examen de reprise / Dr. Calvin Pride. - Février 1979

GEO 1511. - Supplemental Exam / Dr. Calvin Pride. - February 1979

GEO 1512. - Géologie générale : examen final / C. Pride. - Avril 1979

GEO 2110. - Paleontology =Paléontologie: Final Exam = Examen final / O. A. Dixon. -
April 1979 = Avril 1979

GEO 2321. - Final Exam / D. D. Hogarth. - December 1978

GEO 2322. - Optical Mineralogy: Final Examination / D. D. Hogarth. - December 11,
1978

GEO 2323. - Rock-Forming Minerals: Final Examination / D. D. Hogarth. - April 1979

GEO 3110. - Stratigraphy & Sedimentation: Final Exam =Examen final / O.A. Dixon. -
April 1979 = Avril 1979

GEO 3120. - Mineral Deposits: Christmas Exam / Dr. G. A. Armbrust. - December 1978

GEO 3130. - Structural Geology: Final Examination / W. K. Fyson. - April 1979

GEO 3140. - Sedimentary Petrology: Final Exam / B. R. Rust; J. Veizer. - December
1978
