

**Renfrew Medical Group**

Location: 510 Raglan St North, Renfrew, ON K1V 1P5

Tel: 613-433-9152

Primary Preceptor: Dr. Steven Radke

Located in the beautiful community of Renfrew, the Raglan Street Clinic is extremely varied with each day bringing new challenges and opportunities. Dr. Steve Radke works a few days per week doing standard office visits, a few days in the emergency department, a day per week doing a sports medicine clinic, daily rounds in the hospital with in-patients, minor procedures, palliative care, assist in the OR, and the occasional house visit.

The clinic itself is in a state-of-the-art medical professional building supported by a team of seven physicians, two office staff and two full time registered nurses. The office uses Practice Solutions Software electronic medical records.

The affiliated Renfrew Victoria Hospital has a 12 station Renal Dialysis Unit that is run by family physicians and two nephrologists. The hospital has a full range of specialty clinics run by visiting specialists, a general surgeon, internist and radiologist. It also has a two room OR, and a family physician run obstetrical unit. The radiology department offers full services, including a recently added 64 slice CT scanner.

A resident coming to Renfrew will have a complete and wide ranging experience of working in a rural hospital with modern diagnostic and treatment facilities.

Social opportunities are plenty – including spending time on a local lake swimming or canoeing, participating in summer or winter sports, or enjoying the sunset at a cottage. As a former rural resident, Dr. Radke says that there is “no better way to practice.”
