If you have previously tested positive on a Tuberculin Skin Test (TST), you should not be retested. However, proof of your positive TST and chest X-ray report must be submitted. In addition, the Tuberculosis Signs and Symptoms Self-Declaration form must be completed annually in lieu of your annual TST requirement.

Please check off any of the applicable boxes below if you are currently experiencing any of the following signs and symptoms of tuberculosis:

- ☐ fever
- ☐ persistent cough longer than two weeks
- ☐ chills
- ☐ coughing up bloody sputum
- ☐ night sweats
- ☐ shortness of breath
- ☐ flu like symptoms
- ☐ breathing difficulty
- ☐ unexplained loss of weight
- ☐ chest pain

☐ I CONFIRM THAT I AM NOT EXPERIENCING ANY OF THE ABOVE SIGNS OR SYMPTOMS

If you begin experiencing any of the above signs and symptoms, you must consult your health care professional and IMMEDIATELY advise your Clinical Placement Risk Management Advisor.

Signature: ________________________________________________

Date (yy/mm/dd): __________/ __________/ __________

Please email this form to your corresponding Clinical Placement Risk Management Advisor at the University of Ottawa.
