Global Health Faculty Mobility Application Form

uOttawa Faculty of Medicine – Kilimanjaro Christian Medical University College (KCMUCo)
Partnership

The partnership between uOttawa's Faculty of Medicine and KCMUCo will improve healthcare access and health equity for local populations, especially women, in Kilimanjaro Region, Northern Tanzania, through three interrelated pathways:

Clinical Partnership Activities	Public Health Partnership Activities	Student Mobility and Coordination Activities
We will improve the ability of KCMC hospital to respond to the healthcare needs of the local population through enhanced clinical skills and leadership training and mentorship in clinical research and teaching.	We will strengthen the ability of KCMUCo to address pressing public health challenges facing the local population through enhanced education of the future public health workforce and collaborative research on priority public health issues.	We will enhance the ability of faculty and learners at University of Ottawa and KCMUCo to collaboratively act to reduce health inequities, through bi-directional exchanges and joint coordination with a focus on shared benefits.

Eligibility Criteria

The applicant must:

1. Be a faculty member at the University of Ottawa Faculty of Medicine, who is applying to fund outgoing mobility for themselves or incoming mobility for a counterpart at KCMUCo
2. Demonstrate an understanding and commitment to the ethical principles of global health, as set out in the Brocher Declaration
3. Have an identified counterpart at KCMUCo
4. Demonstrate a commitment to advancing the global health goals defined by the Faculty of Medicine in the 2020-2025 Strategic Plan
5. Commit to providing a 1–2 page report on their activities in the format requested by the International and Global Health Office (IGHO)

The mobility activity must:

1. Fall within the Clinical Partnership Activities or Public Health Partnership Activities interrelated pathways indicated above
2. Be built on an education and capacity building model
3. Focus on activities that respond to priority needs identified by KCMUCo
4. Align with the theory of change and logic model established for the KCMUCo partnership

Value of the funding

Outgoing mobility: up to \$3,000

Incoming mobility: up to \$5,000

Funding will be reimbursed up to the set amounts indicated above. Each applicant will be responsible for managing all associated travel expenses as per the policies and procedures of the University. For uOttawa Faculty, this will involve using the Concur system to request cash advances (if needed) and to request reimbursements up to the stipulated amount. For incoming faculty, the uOttawa faculty applicant will be responsible for supporting their Tanzanian counterpart throughout the process.

Upon approval of funding, IGHO will provide details on eligible costs and all associated financial processes. Recipients will be responsible for reading, understanding, and adhering to uOttawa travel policies and regulations.

Eligible expenses include:

- Equivalent of economy class flight
- Accommodations costs
- Visas
- Travel/health insurance while overseas
- Local transportation and meals

Mobility information

1. Is this an incoming or outgoing faculty mobility initiative?

Format

2. Please select the applicable partnership pathway(s) of your mobility activity:

- Clinical Partnership Activities
- Public Health Partnership Activities

3. Type of activity:

- Clinical
- Research
- Teaching
- Community-based work
- Other — please specify:

4. Approximate travel dates and duration of the stay:

Logistics

The International and Global Health Office (IGHO) can provide some logistical support, as well as guidance and key information to help you coordinate your mobility initiative. Please refer to the attached PDF to understand the breakdown of roles and responsibilities between the participating faculty member and the IGHO.

5. For incoming mobility, please specify what supports you have in place to organize the logistics and coordination of your counterparts' travels to and time spent in Canada. Please also indicate any additional logistical support you may need for your initiative (beyond what is already offered by the IGHO, see attached PDF)

Funding

6. Please outline a brief budget for your activity:

Expense	Estimated cost (Cdn\$)

6. Will your faculty, department, or service provide any additional funding or in-kind contributions (e.g. providing accommodation for incoming faculty or recruiting self-funded Ottawa trainees to contribute to outgoing mobility)?

- No
- Yes — please specify the amount or type of contribution:

7. Will KCMUCo provide any funding or in-kind contributions (e.g., providing accommodation or local transportation)?

- No
- Yes — please specify the amount or type of contribution:

Motivations and qualifications

8. Briefly describe your interest in global health and any related experience (*maximum 150 words*).

Project proposal

9. Please describe the mobility initiative (structure of the activities, including the capacity building plan, role of your department, any material resources needed, etc.) (*maximum 150 words*).

Alignment with KCMUCo partnership

100-150 words per question

10. Please describe how this mobility activity will contribute to improved healthcare access and health equity for local populations, especially women, in Kilimanjaro Region, Northern Tanzania. More specifically, please describe how it will support the immediate and intermediate outcomes as identified in the partnership logic model, by indicating which outcome(s) /output(s) it will contribute to (e.g., this will contribute to Activity #1221.1)

11. For outgoing mobility, please describe how this will contribute to sustained activities within the KCMUCo partnership, specifically explaining planned or potential bidirectional activities related to your area of specialty and how you will be involved in this process.

12. For incoming mobility, please describe how you will support the implementation of the skills learned upon return to KCMUCo (reflecting on resource and technology limitations, opportunities to use new skills, etc.)

13. Please describe how this experience can contribute to learning within your department and the Faculty of Medicine as a whole.
