Faculty of Medicine – Director, Anatomical Sciences

The Director, Anatomical Sciences serves as the content expert for anatomy in the Faculty of Medicine’s bilingual undergraduate medical education program and is responsible for ensuring that anatomical sciences education at the Faculty of Medicine and in outreach events are aligned with best practices and current knowledge in the field.

Responsibilities of the Director, Anatomical Sciences:
- Serve as Graduate Program Director of the Master of Applied Science in Anatomical Sciences Education (ASE).
- Contributing to the delivery of lectures, supervision of in-person labs, recruitment of teaching personnel, delivery, and optimization of laboratory activities.
- Ensure provision of state-of-the-art teaching methodology for the anatomy program in both language streams and the graduate program.
- Recruit and provide leadership & mentoring to faculty members who teach anatomy related sciences.
- Supervising graduate students in their education research projects related to the enhancement of anatomy teaching, learning and assessment.
- Serving as member of multiple committees for graduate studies as well as the medical school.
- Serving as Lead of practical exams for medical school courses as well as the graduate program.

Applicants must meet the following qualifications:
The successful candidate must have:
- PhD, MD/PhD, or MD with the ability to supervise graduate students.
- A proven track record of engaging teams, balancing organizational priorities, demonstrating academic excellence, and performing research.
- Experience in engaging teams and leading change.
- Excellent interpersonal, communication, organizational and leadership skills.
- Demonstrated national or international impact in one or more of the following domains: teaching, academic leadership, and research.
- A clinician or researcher who is in good standing with their professional governing body.
- Experience in program and curriculum development.
- A university rank of Associate or Full Professor.
- Eligibility for medical licensure in Ontario (if applicable).
- Fluency in English or French and a minimum of a passive knowledge of the other.
- The ability to work in a morgue-like environment with the presence of human cadavers as applicable by the program. This includes tolerating smells of chemicals used in the laboratory.

Location and Compensation:
- Time allocation: 2 days a week. Consideration will be given to flexible work arrangements to allow the demands of the service to be spread over the entire week.
- Compensation: Will be aligned with the FoM guidelines for administrative stipends.

The duration of the appointment would be up to 5 years, renewable once. You are invited to forward a letter of intent and CV by August 24, 2023 to:

Gina Campbell,
Manager, Research and Program Support
