- Laboratory

Restore is a multidisciplinary clinic, providing comprehensive primary care for patients as their foundation. Registering over 5,000 patients, with a waitlist of over 1,100, the Restore Clinic remained open to in-person visits during the COVID-19 pandemic, treating over 2,000 patients. Throughout the pandemic, the Restore clinic held weekly COVID-19 vaccination clinics, administering over 200+ doses. The clinic team completed over 300+ well-baby visits and administered over 100+ baby immunizations through their pediatric services. The clinic and its physicians support the BIPOC community through culturally relevant and sensitive care.

The Team:

Dr. Danielle Brown-Shreves is the Founder, CEO and owner of the Restore Medical Clinic. She received her medical degree in Jamaica and completed her residency at the University of Ottawa. Dr. Brown-Shreves holds a Master of Science in Global Health from Northwestern University, and opened the first black-led interdisciplinary clinic of its kind in Ottawa.

Dr. Brown-Shreves is an assistant professor at Queen's University and holds an adjunct appointment at the University of Ottawa. In this role, she is an avid preceptor and supports many students throughout their training. Dr. Brown-Shreves is a healthcare leader who sits on several leadership tables both locally and provincially, contributing to community health, well-being and health system change.

Dr. Brown-Shreves is also an involved community member. In 2018, she founded the Restore International Foundation, a charity organization that serves vulnerable populations by increasing access to medical care and education for those who are historically marginalized. She selflessly volunteers her time advocating for the needs of others and her work has had an impact on a global scale.

Dr. Anike Ugochukwu is a family physician with over 20 years of experience. He has worked in several countries including Nigeria, South Africa and Canada.

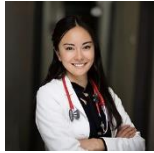

He completed his graduate degree in Nigeria and later moved to South Africa where he pursued postgraduate training in family medicine. In South Africa, he worked in many hospitals in various capacities contributing immensely to comprehensive, coordinated and continued care of the community and province at large.

He headed the Department of Medicine in his institution and was actively involved in teaching medical students and postgraduates. He received many awards and is also a published researcher in the African Journal of Primary Health Care & Family Medicine.

Dr. Ijeh completed Medical School in Nigeria and then relocated to the UK where he completed his residency in Family medicine under the Yorkshire and Humber GP training Scheme in 2020. Since then he has practiced as a family doctor at various clinics in the South Yorkshire Region of England.

He is passionate about health promotion and disease prevention. He also has a passion for dermatology and is currently undergoing a postgraduate diploma course in Clinical dermatology at the Queen Mary University London.

Dr. Chan graduated from the University of Calgary and completed her residency in Family Medicine at UOttawa. During residency, she developed special interests in women's health, medical weight management, and minimally invasive cosmetics.

She is passionate about helping women pursue holistic health through all phases of their life, from reproductive age to menopause.
