

Views of Canadians on energy, climate change, and the job done by Governments in Canada.

The research gauged the opinions among Canadians on the job done by governments in Canada on meeting climate change targets, ensuring energy affordability and security, and balancing Canada's economic, environmental and energy objectives. Canadians were also asked about their views on the best time to address climate, the level of agreement on climate action in Canada, Canada's credibility on the international stage when it comes to environmental policies, and where Canada should be on meeting its climate change targets compared to other major economies.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,001 Canadians, 18 years of age or older, between May 26th and 30th, 2022 as part of an omnibus survey.

The research was commissioned by the University of Ottawa's Positive Energy Collaborative and was conducted by Nanos Research.

Key Findings - Energy

1

AWARENESS OF 'NET ZERO' TARGET

About three in four Canadians have heard about Canada's 'net zero' climate change target. Those who have heard of Canada's 'net zero' target most often think the term 'net zero' means not emitting more carbon than is collected or balancing out the impact (54%). Those who have not heard about the 'net zero' target most often report they are unsure what the term means (27%), followed by reducing or eliminating carbon emissions (24%).

2

AGREEMENT THAT CANADA SHOULD MEET CLIMATE COMMITMENTS

Three in five Canadians agree (31%) or somewhat agree (31%) that Canada should meet its climate commitments, even if it means energy prices increasing which is consistent with the previous waves in February 2022 and September 2019.

3

AGREEMENT WITH EXPANDING CANADA'S OIL & GAS EXPORTS

About six in ten Canadians agree (33%) or somewhat agree (25%) that Canada should expand oil and gas exports to help the world have more secure and reliable energy supplies, while one in three disagree (19%) or somewhat disagree (15%). Residents from the Prairies (52%) and men (42%) are most likely to agree with this.

4

AGREEMENT WITH CANADA'S EXPORTS COMBATTING GLOBAL CLIMATE CHANGE

About two in three Canadians agree (35%) or somewhat agree (32%) that exports from Canada's oil and gas sector can contribute to combatting global climate change if our exports displace energy sources in other countries that are more damaging to the climate. This is consistent with the previous wave in 2019. Residents of the Prairies (54%) and B.C. (40%) are most likely to agree with this.

Key Findings – Climate Change

TIMING TO BE AMBITIOUS IN ADDRESSING CLIMATE CHANGE

About one in two Canadians think it is the best time (score of 7-10) (51%) for Canada to be ambitious in addressing climate change even if there are costs to the economy, a marginal decrease from the previous wave in February 2022 (54%). Residents of Quebec are most likely to rate now as the best time for Canada to be ambitious (61%).

MEETING CLIMATE TARGETS COMPARED TO OTHER MAJOR ECONOMIES

Canadians are over three times more likely to say Canada should aim to be ahead (41%) rather than behind (12%) other major economies when it comes to meeting climate targets. About four in ten say Canada should aim to be at about the same place as other major economies (43%). Younger Canadians are more likely to say Canada should be ahead (46%) than those aged 55 plus (36%).

COMPARISON TO OTHER MAJOR ECONOMIES BY VOTE PREFERENCE

Canadians who usually vote NDP (60%) or LPC (53%) are most likely to prefer Canada aiming to be ahead of other major economies when it comes to meeting climate targets, while those who usually vote CPC are most likely to say Canada should aim to be at about the same place (54%).

LEVEL OF AGREEMENT ON CLIMATE ACTION IN CANADA

Canadians are twice as likely to think there is low agreement (score of 0-3) (30%) on climate action in Canada than high agreement (score of 7-10) (15%). There has been a noticeable decline in those who think there is high agreement on climate action in Canada since the previous wave in 2021 (15%; down from 22% in 2021).

Key Findings – Job Done by Government

1

JOB DONE PROVIDING POLICY ENVIRONMENT FOR ENERGY INVESTMENTS

About four in ten Canadians think governments in Canada do a very poor (19%) or poor job (20%) at providing a clear, predictable and competitive policy and regulatory environment for investors building energy infrastructure to help Canada meet its climate change targets, followed by three in ten who think they do an average job (31%). Residents from the Prairies (31%) and B.C. (26%) are more likely to say they are doing a very poor job than those from Quebec (11%).

2

JOB DONE COLLABORATING TO BALANCE OBJECTIVES

Over one in two Canadians think governments in Canada do a very poor (23%) or poor job (32%) of collaborating with each other to balance Canada’s economic, environmental and energy objectives, followed by about three in ten who think they do an average job (30%). Residents from the Prairies are three times more likely to think they do a very poor job (39%) than those from Quebec (13%).

3

JOB DONE ENSURING ENERGY IS AFFORDABLE

About one in two Canadians think governments in Canada do a very poor (24%) or poor job (27%) of ensuring energy is affordable as Canada works to meet its climate change targets and are over four times more likely to think governments in Canada do a poor job rather than a good job (six per cent). About one in three think they do an average job (32%).

4

CREDIBILITY ON THE INTERNATIONAL STAGE

Canadians are three times more likely to say that Canada has less (19%) or somewhat less credibility (25%) on the international stage as other countries when it comes to environmental policies on climate change than more (two per cent) or somewhat more (11%). Four in ten think Canada currently has about the same credibility as other countries (39%).

Awareness of Canada's 'net zero' target

Q

Have you heard or not heard about Canada's 'net zero' climate change target?

	Atlantic (n=97)	Quebec (n=216)	Ontario (n=332)	Prairies (n=206)	BC (n=150)

Trust in advancing responsible dialogue about the economy, energy and the environment

Q

Who would you trust most to advance a responsible dialogue about the economy, the energy sector and the environment [RANDOMIZE]

“

Although the top trusted groups to advance a responsible dialogue about the economy, the energy sector and the environment remain universities and the federal government, trust has declined noticeably from the previous wave in 2015. Uncertainty of who Canadians would trust most has almost doubled since 2015 (20% compared to 12% in 2015).

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, May 26th to 30th, 2022, n=1001, accurate 3.1 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,001 Canadians, 18 years of age or older, between May 26th to 30th, 2022 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialing with a maximum of five call backs.

The margin of error for a random survey of 1,001 Canadians is ± 3.1 percentage points, 19 times out of 20.

The research was commissioned by Positive Energy at the University of Ottawa and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	Positive Energy at the University of Ottawa	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1,001 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Hybrid Probability Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Estimated Response Rate	Eleven percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, views on Canada's relationship with the British Monarchy, Chinese telecom companies, the Liberal-NDP agreement, inflation, standard of living, and missing and murdered Indigenous women and girls.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	May 26 th to 30 th , 2022		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/
