

# Research Security

---

## Promoting a secure research environment

### Safeguarding Research

We promote best practices through our research community roundtable and online one-stop shop.

### Targeted Training

We provide resources and training on research security, cybersecurity and open-source due diligence.

### Due Diligence and Risk Assessments

We assist researchers by reviewing their partners, risk assessments and risk mitigation strategies.

### Security Briefings

We inform researchers of need-to-know research security topics and brief them ahead of travel.
